- **ROBUST CONSTRUCTION**
- **CAPACITY 250kg**
- **VARIABLE ADJUSTABLE
100°C – 400°C**
- **3700 Watt HEATING
POWER**
- **INDICATOR LIGHT**
- **HEAT BUFFER**
- **4 SHELVES**

The Dryfast welding electrode drying oven SET - 50 is the ideal model for use in the workshop in the field of re-drying.

Thanks to the infinitely variable thermostatic control, the SET-50 electric electrode dryer is extremely versatile.

The SET-50/4 welding electrode dryer has 4 shelves, each with 5 divided electrode compartments, allowing several types of electrodes to be stored in a clearly organised manner.

The appliance has a capacity of approx. 50 packets of electrodes.

The housing and door are double-walled and well insulated.

The appliance has a thermostat with indicator light, so the drying temperature can be infinitely adjusted up to 400 °C.

The interior, including the supports, is made entirely of stainless steel.

On request, we can include a built-in dial thermometer with a display range of 0-400 °C.

All these features make the SET - 50 the ideal appliance for stationary use.

It is supplied without connection cable and plug.
